### COURSE TOPIC: FRIDAY APRIL 9<sup>TH</sup>

**Deep Modalities (Track 1):** 15-hour class taught over Fri-Sat-Sun. Evidenced-based clinical review & practical applications for neuro, rehab & ortho pts using therapeutic TENS, FES & ultrasound across the lifespan. Hands on lab: TENS, FES & ultrasound. Bring textbooks on anatomy &/or modalities for review (opt).

### COURSE TOPICS: SATURDAY APRIL 10<sup>TH</sup>

**AT for Every OT's Toolbox (Track 2):** This workshop will empower fellow OT's working in a variety of practice areas to identify the skills you bring to feel more confident when addressing basic AT needs from w/c's to computer access. Objectives: a systematic process for AT intervention, resources & funding systems in MT, case study exercises and leave w/ practical info to add to your toolbox.

**Sensory Processing Disorder: Practical Strategies & Intervention (Track 3):** This workshop will provide participants w/ current information on Sensory Processing Disorder & approaches to enhance sensory processing development in children w/ SPD. Obj.: Define SPD & subtypes, recognize & assess SPD across environments, develop interventions, design & implement a sensory diet.

**Keynote Address (Lunch hour): 2010: Occupational Therapy's Opportunity:** This session will examine the current status of the health care reform, OT opportunities w/ the health care reform & the midterm elections. Learn how political action & advocacy is vital for OT to thrive in this decade & how to join together to make the OT message heard.

### COURSE TOPICS: SUNDAY APRIL 11<sup>TH</sup>

**Compliance & Documentation -What OT's Should Consider (Track 2):** Target audience: Inpatient rehab & acute care therapists. Course objectives: Identify OT documentation opportunities to meet audits, learn key elements in 2010 Medicare policy changes for inpatient rehab units and understand the roles OT's have in surveys and compliance areas.

### The Role of OT's in Home Health Care (Track 2):

This session will discuss how the existing health care crisis is in need of reform & how the OT role in today's home health care arena can be the fulcrum to help level that change. Objectives: Roles that OT's play in chronic care mgmt, utilization of the OT in the multidisciplinary team approach to accurately collect OASIS data, & improve both clinical & financial outcomes w/ pt care.

**Vision Therapy Course (Track 3):** This course will discuss what vision therapy entails, the visual conditions that benefit from it & the referral process. It will cover practical applications w/ assessment of visual problems within the pediatric population.
